## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a DNA construct comprising an isolated nucleic acid molecule which encodes a serine proteinase inhibitor, a host cell and a plant transformed comprising said DNA construct, classified in class 800, subclass 279, for example.
  - II. Claims 14-20, drawn to a method of conferring insect resistance in a plant by transforming the plant with an isolated nucleic acid molecule encoding a serine proteinase inhibitor, classified in class 43~~5~~ subclass 468, for *MAI* example.
  - III. Claims 21-28, drawn to a method for conferring insect resistance in a plant by external application of the plant with an isolated proteinase inhibitor, classified in class 435, subclass 6.1, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 1638

process of using that product (MPEP § 806.05(h)). In the instant case, the product of Group I can be used in a materially different process such as hybridization.

3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions use different products and have different modes of operation.

4. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed of capable of use together and have different functions and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper. In addition, the search required for one group is not required for another. Therefore, the coexamination of Inventions I-III will pose a series search burden upon the Examiner.

Art Unit: 1638

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers relating to this application may be submitted to Technology Sector 1 by facsimile transmission. Papers should be faxed to Crystal Mall 1, Art Unit 1638, using fax number (703) 308-4242.
